

Helpbuttonsm

Platform for building free digital cooperation infrastructures
Concept presentation – 2026

The background is a solid yellow color. It is decorated with various white geometric shapes: small triangles, plus signs, minus signs, and a circle, scattered across the page. The main title '01 INTERNET: INTERCONNECTED NETWORK' is centered. The '01' is in a large, bold, black font. The text 'INTERNET: INTERCONNECTED NETWORK' is in a smaller, bold, black font. Below the title is a subtitle 'A reflection on the true purpose of the Internet.' in a smaller, regular black font.

01 INTERNET: INTERCONNECTED NETWORK

A reflection on the true purpose of the Internet.

01

HUMANS NEED COOPERATION TO LIVE

02

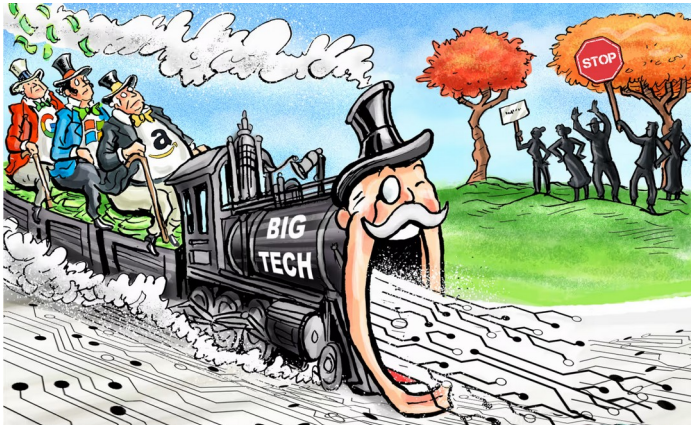

The Internet represents an unprecedented means of cooperation

03

But cooperation software is only designed for economic profit

04

Is digital cooperation possible as an alternative to Big Tech and startups?

AN OFTEN IGNORED REALITY

The creation of digital infrastructures: within reach of the majority

- User count does not define the quality of an app/website. **More users $\neq$ More quality or usefulness**
- A server for thousands of people in a nearby geographic area can be maintained for **30-50\$/month**.

Why has the opposite idea been promoted?

The Big Tech and startup business model needs to concentrate the largest number of people for as long as possible.

To facilitate control and influence over the masses, centralized tools are required.

Result: Society ends up serving the software.

LET'S CHANGE OUR MINDSET

Knowledge and autonomy over data storage and digital tools are key to equal opportunity.

PRINCIPLES OF A DIGITAL ETHICS

1. Spread basic knowledge about free software, servers, and decentralized protocols. 
2. Promote user control over tools and data.
3. Design for real-life cooperation, not for mindless digital consumption — a source of cognitive underdevelopment, depression, and anxiety. 
4. Design to optimize resources, both in infrastructure (federation) and in user interactions (sharing goods, actions, and means). 

The background is a solid yellow rectangle. Scattered across it are various white geometric shapes: small triangles, plus signs, minus signs, and a circle. These shapes are positioned at various angles and locations, creating a playful, abstract pattern.

02 **HELPCUTTONS**

A new software and cooperation proposal, applying ethical principles.

A platform with two lines of action:

1. SOFTWARE

A tool developed by volunteer programmers and designers.

Designed for real-life cooperation.

2. INICIATIVA SOCIAL

Creating cooperative networks and digital autonomy requires training.

The Helpbuttons team trains others in network creation, servers, and free software.

Contact to cooperate:

help@helpbuttons.org

How the software works

Modular design: Users can adapt the same software to their purpose.

Share transport, exchange items, coordinate caregiving, sell food...

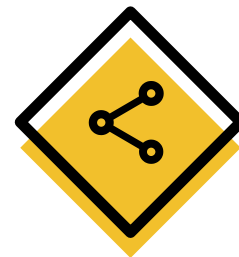

Always geolocated networks (proximity-first) and connected to other initiatives (federated).

Optimizes resources in each network. No macro-servers needed. Cooperation in small, linked groups.

Bugs and improvements are shared = Development costs shared across all networks.

For more details on the Helpbuttons structure, see the documentation at:

NEW REALITIES: NEW NEEDS

What this means for users.

REQUIRES INVOLVEMENT

from some users at two levels:

LOCAL LEVEL

Where there are people, there are conflicts.
Decentralized moderation requires a group of people to take on project leadership.

GLOBAL LEVEL

Where there's software, there are bugs. Report bugs and improvements to the developer community and contribute to the benefit of all networks.

TRIAL AND ERROR

No design is foolproof, but rather continuous testing to improve together.

Create your network

IN TWO WAYS:

1. ON YOUR SERVER

Follow the steps to create your server and install Helpbuttons here:

<https://cloud.wofreedom.org/s/wae8FPenaK8MeTD>

FORMACIÓN

If you want to teach digital autonomy to groups and/or learn about free software, contact us.

2. ON OUR SERVER

Or request your network on the project website and we'll create it for you:

[Helpbuttons.org/registration](https://helpbuttons.org/registration)

Questions? The community will help you on Telegram:

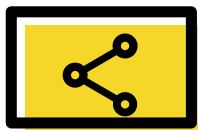

t.me/helpbuttonsgroup

Try the demo

<https://dev.helpbuttons.org>

Note: this is just an example — both the post types (caregiving, animals, selling, etc.) and the location are fully configurable.

¿QUÉ HACER TRAS CREAR LA RED?

SHARE

Links, hand out invitations, print post lists and put them up in your area, organize regular meetups.

FEDERATE

With other nearby networks to share users, resources, and content. Ask us about it.

Helpbuttons

See real examples of networks created at:

[**www.Helpbuttons.org**](http://www.Helpbuttons.org)

If you want to collaborate as a programmer, communicator, or simply as a user:

Join us on Telegram:
